Writing

Our world has a lot of countries, for instance Russia, China or Spain. At the same time countries are similar and different. Everything has own culture, food and natural resources.

The food is the main thing which shows country's history. Russia's main dish ^{are} is dumplings. We created this food because a lot of people lived in Siberia where temperature of air is -30° or -40° . These people needed in a good dish which can make them fully and it should ~~not~~ not be difficult in cooking. You need to take ^{the} meat, then put it in the dough and boil it. In Japan main dish is the plate of rice. They planted a lot of ^{kinds} species of rice for centuries. Nowadays, inhabitants created thousands ~~recipes~~ recipes with rice and ^{write} tips how to cook correctly.

The Natural resources are limited. Some countries have a lot ^{of} coals, gases, irons but other countries don't have them. Every inhabitant wants to live in the best conditions. It is the main reason why countries share resources with each other.

Culture is a thing which shows mood, ~~like~~ people, historical moment and souls. Every country try to differs from others with culture activities. Some ^{of them} create unusual dances, unique clothes or traditions. For instance Kyrgyzstan every year
Ал. Мекенчилдин муму

makes a tradition when some people catch sleep and kill it with #11
pray. Then they cook it and eat in a circle of relatives.

In conclusion I want to say that countries are different but we
can't forget that we are all people and we ~~always~~ must try to save
good relationships. each other and help each other.
